Professional summary

A highly skilled professional with expertise in HTML coding, CSS, Python, and C++. Adept at leveraging technical skills to drive efficiency and innovation. Seeking opportunities to apply analytical and coding skills in a dynamic environment. As a fresher web application developer, I am passionate about building dynamic and user-friendly websites and applications. I have a strong foundation in web technologies such as HTML, CSS, JavaScript, and frameworks like React or Angular. I am also familiar with backend development using languages like Node.js, Python, or PHP, along with databases like MySQL. I enjoy problem-solving, learning new technologies, and improving my coding skills. My goal is to develop efficient, responsive, and secure web applications while gaining hands-on experience and growing as a developer in the industry.

Experience

- Utilised JavaScript, HTML, and CSS to create interactive and visually appealing web pages.
- Developed and maintained responsive website designs, improving user experience across various devices.
- Designed responsive website interfaces with HTML, CSS, and JavaScript. - developed excellent working knowledge of industry trends and improvements in processess.
